Overview

VeraMind is a comprehensive mental health and self-discovery platform that provides users with tools for understanding cognitive patterns, managing anxiety, exploring career paths, and improving overall mental wellbeing through evidence-based assessments, journaling, educational modules, and community support.

Core Purpose

- **Self-awareness:** Help users identify cognitive biases and thought patterns
- **Mental health management:** Provide tools for anxiety, stress, and mood tracking
- **Personal growth:** Guide users through structured learning modules
- **Community support:** Connect users with peers and professional resources

Technology Stack

Frontend (App):

- Framework: Vue 3 / Nuxt 3 (The modern, full-stack Vue framework). (JS NO TS)
- Build Tool: Vite (Built into Nuxt 3).
- Styling: Custom CSS/SCSS (No UI Libraries/Frameworks). All components (buttons, cards, forms, layouts) will be built from scratch using your custom assets/css/main.css file.
- Deployment: Vercel (Free tier for hosting the Nuxt app and server-side routes).

Backend (Data & Auth):

- Database (Relational): Supabase (Free-tier Postgres for users, profiles, journal entries, assessments, etc.).
- Authentication: Supabase Auth (Handles email, password, and Google/OAuth logins).
- Real-time (Community): Supabase Realtime (Powers the live community chat feed).

Backend (AI & Machine Learning):

- AI Model 1 (Classical ML): FastAPI (Python) + Hugging Face Spaces (Free-tier CPU-based hosting for our Python-based XGBoost/scikit-learn models).
- AI Models 2-6 (NLP, RAG, Agents): Google AI Studio (Gemini 2.5 Pro API) (Free, powerful tier for all generative and analytical NLP tasks).
- Vector Database (RAG): Supabase pgvector (Free, built-in vector extension for our Postgres database. This will store article embeddings for RAG).
- AI Logic (Orchestration): Nuxt 3 Server Routes (on Vercel) using LangChain.js (or the Vercel AI SDK) to coordinate RAG, agents, and API calls.

Component Hierarchy

- **App:** Public Routes (Index, SignUp, Login)
- **Protected Routes** (wrapped in ProtectedRoute):

- **DashboardLayout**
 - **Sidebar** (persistent navigation)
 - **Main Content Area**
 - **Dashboard**
 - **Assessments / AssessmentDetail**
 - **Insights**
 - **Journal**
 - **Community**
 - **Modules / ModuleDetail**
 - **Resources**
 - **EducationalMaterials**
 - **SelfHelpTools**
 - **FindHelp**
 - **Settings**

User Flows

1. Authentication Flow

Sign Up Journey

- **Landing Page** → Click "Get Started"
- **Sign Up Form**: Enter email, password, full name; Accept terms and conditions
- Submit form → Success: Auto-redirect to Dashboard
- **Error Handling**:
 - Email already exists → Show error message
 - Weak password → Show password requirements
 - Network error → Show retry option

Login Journey

- **Landing Page** → Click "Sign In"
- **Login Form**: Enter email and password
- Submit credentials → Success: Redirect to Dashboard
- **Alternative Paths**:
 - Forgot Password → Password reset flow
 - No account → Link to Sign Up

Protected Route Access

- User attempts to access protected page

- If authenticated → Allow access
- If not authenticated → Redirect to Login
- After login → Redirect to originally requested page

2. Dashboard Flow

Initial Dashboard View

- User logs in → Dashboard loads
- Welcome message with user name
- **Quick Actions** (3 cards):
 - Start weekly check-in → Navigate to Assessments
 - Continue active module → Navigate to Module detail
 - Write in journal → Navigate to Journal
- **Recent Insights:** Anxiety level trends (chart visualization); Active Modules progress cards (shows completion percentage + Continue button)
- **Crisis Support Section:** Always visible

Navigation from Dashboard

- Dashboard serves as central hub
- Quick actions → Direct feature access
- "View all" links → Full feature pages
- Module cards → Continue learning
- Sidebar → Global navigation
- Crisis banner → Immediate help resources

3. Assessment Flow

Assessment Discovery

- **Dashboard / Sidebar → Assessments Page**
- Two tabs: **Available / Completed**
- **Available Assessments:** Card grid layout (2 columns on desktop)
 - Each card shows: Category badge, Title and description, Estimated time, Start Assessment button
 - Disclaimer about non-diagnostic nature
- **Completed Assessments:** Shows completion date, Award badge icon
 - Actions: View Results, Take Again

Taking an Assessment

- Click "Start Assessment" → **Assessment Detail Page**
- Assessment instructions and disclaimer
- **Question presentation:** Single question per screen (preferred UX); Multiple choice or scale responses
- Progress indicator; Navigation (Previous/Next); Review answers (optional)
- Submit → Assessment Processing indicator → Redirect to Results

Results

- **Display:** Score interpretation, Severity level visualization
- Personalized recommendations, Educational resources links
- Option to save/download results

Assessment Types

1. **GAD-7 Anxiety Screening**
 - 7 questions, 4-point scale
 - Time: 2-3 minutes
 - Scoring: 0-21 scale
2. **PHQ-9 Depression Screening**
 - 9 questions, 4-point scale
 - Time: 3-4 minutes
 - Scoring: 0-27 scale
3. **Cognitive Bias Inventory**
 - 15-20 questions
 - Time: 5-7 minutes
 - Identifies thinking patterns
4. **Core Values Assessment**
 - Value ranking and prioritization
 - Time: 10-12 minutes
 - Guides career/life decisions

4. Journal Flow

Journal Main Page

- **Dashboard / Sidebar** → **Journal**
- Three tabs: **Write** (default), **Past Entries**, **Calendar View**
- Date selector (calendar widget)
- Journal prompt (rotatable)
- Rich text editor area

Writing Flow

- **Write Tab** (Active):
 - Select date (defaults to today)
 - Read prompt → Click to rotate through options
 - Write entry in editor (Rich text formatting)
 - Auto-save drafts (future feature); Character/word count
 - Click "Save Entry" → Success toast notification; Entry added to database; Editor clears
 - Optional: Add tags or mood rating
- **Prompts System**:
 - "What's on your mind today?"
 - "What are three things you're grateful for today?"
 - "Describe a challenge you faced recently..."
 - "What values guided your decisions today?"
 - "Reflect on something that made you feel anxious..."
 - "What biases might have influenced your thinking today?"

Past Entries View

- **Past Entries Tab**: Chronological list of entries
 - Entry: Date and time, Content preview (first 150 characters), Associated prompt
 - Click to expand full entry
- **Filter/Search options**: Date range filter, Keyword search, Prompt filter
- Empty state: "Write Your First Entry" CTA
- **Entry actions**: Edit entry, Delete entry (with confirmation), Share/Export entry

Calendar View

- **Calendar Tab**: Monthly calendar grid
 - Dates with entries highlighted (purple)
 - Click date → Opens entry in Write tab
- Visual patterns: Consistency tracking, Frequency visualization
- Current date selection indicator

Journal Analytics (Future)

- Insights Integration: Sentiment analysis of entries, Mood trend visualization
- Common themes identification, Writing frequency patterns
- Personalized insights

5. Learning Modules Flow

Module Discovery

- **Dashboard / Sidebar → Modules Page**
- Grid of available modules (2 columns)
- Each module card displays: Icon and category color, Title and description, Progress percentage, Start or Continue button
- Modules available:
 - Anxiety Toolkit
 - Cognitive Bias Awareness
 - Career Path Explorer
 - Self-Compassion Builder

Module Progression

- Click module card → **Module Detail Page**
- Module overview: Description and learning objectives, Estimated time to complete
- Progress indicator, Difficulty level
- **Content sections/lessons:** Sequential unlocking
 - Video content (if available)
 - Interactive exercises
 - Reading materials
 - Quiz/knowledge checks
- Navigation: Previous lesson, Next lesson, Lesson list sidebar
- Mark as complete; Completion tracking (Lesson completion checkmarks)
- Overall module progress; Certificate/badge on completion
- Recommendations for next module

Example: Anxiety Toolkit Module

- **Module Structure:**
 - Introduction to Anxiety: What is anxiety? Types of anxiety disorders, When to seek help
 - Understanding Your Anxiety: Physical symptoms, Cognitive symptoms, Behavioral patterns
 - Coping Strategies: Breathing exercises (interactive), Progressive muscle relaxation, Cognitive restructuring, Mindfulness techniques
 - Lifestyle Management: Sleep hygiene, Exercise and anxiety, Nutrition impact, Social support
 - Creating Your Action Plan: Identifying triggers, Personal coping toolkit, Crisis plan, Progress tracking

Module Structure

- Sequential lessons/sections
- Mixed content types (text, video, interactive)

- Progress tracking
- Knowledge checks/quizzes
- Completion certificates
- Bookmark/resume capability

6. Community Flow

Community Main Page

- **Dashboard / Sidebar → Community**
- Two main tabs: **Discussions** (default), **Support Groups**
- Discussion board features: Thread list, Filters/sort options, Search functionality
- New Post button
- Community guidelines (always visible)

Discussion Interactions

- **Discussions Tab → Thread List View:**
 - Thread: Title, Author info (name, avatar), Post timestamp, Tags/categories, Message count, Last activity time
 - Click to view full thread
- **Create New Post:** Title input, Content editor, Tag selection, Anonymity toggle, Submit button
- **Thread Detail View:** Original post, Reply thread, Like/dislike buttons, Reply button, Report/flag option
- **Bias check tool:** AI-powered (via Google AI Studio)

Bias Checking Feature

- Any message/post → "Check for Bias" button
- AI analysis of content: Identifies potential cognitive biases (All-or-nothing thinking, Overgeneralization, Catastrophizing, Social comparison bias, Confirmation bias)
- Results displayed: Bias type identified, Explanation, Suggested reframe, Educational resources
- User can: Edit post based on feedback, Dismiss suggestion, Learn more about bias

Support Groups

- **Support Groups Tab:**
 - Group categories: Anxiety support, Depression support, Career transitions, LGBTQ+ mental health, Student mental health, General wellness
 - Group card displays: Group name and description, Member count, Activity level, Privacy setting (open/closed), Join Group button

- **Group Detail** (after joining): Group discussions, Scheduled events, Member directory, Group resources, Moderation tools

Community Features - Support Groups

- Category-based groups
- Join/leave functionality
- Group discussions
- Scheduled events
- Member directory

7. Resources Flow

Resources Hub

- **Dashboard / Sidebar → Resources**
- Crisis Support Banner (prominent): Emergency hotlines, Crisis text line, Immediate help resources
- Three main categories (cards):
 - **Educational Materials**
 - **Self-Help Tools**
 - **Find Help** (Professional Directory)
- Each category card: Icon and description, Preview of contents, Browse Access button

7.1 Educational Materials Flow

- **Educational Materials → Article library interface**
- Search bar (keyword search); Category filter buttons (All, Anxiety, Depression, Stress, Mindfulness, Resilience, Sleep)
- Difficulty filter (Beginner, Intermediate, Advanced); Sort options (Most Recent, Most Popular, Shortest First)
- **Article cards** (grid layout): Title and description, Category badge, Read time estimate, Author name, Difficulty indicator, Tags, Read More button
- Empty state with search suggestion

Article Reading Experience

- Click "Read More" → **Full Article View**
- Back to library button
- **Article header:** Title, Author and credentials, Publication date, Category and tags, Read time
- **Article content:** Rich text formatting, Section headings, Bullet points and lists, Images/diagrams (if applicable), Callout boxes for key points
- **Interactive features:** Bookmark/save article, Share via link, Download as PDF, Print option
- Engagement metrics: Reading progress indicator, Time spent tracking

- Related content: Suggested articles, Related modules, Related tools

Article Categories Examples

- **Anxiety Category:**
 - Understanding Anxiety: A Comprehensive Guide
 - Managing Panic Attacks
 - Social Anxiety in Daily Life
 - Anxiety and Physical Health
- **Depression Category:**
 - Depression: Recognizing Signs and Seeking Help
 - Seasonal Affective Disorder
 - Managing Low Motivation
 - Depression and Relationships
- **Stress Category:**
 - Stress Management Techniques
 - Work-Life Balance Strategies
 - Chronic Stress and Health
 - Acute vs. Chronic Stress
- **Mindfulness Category:**
 - Mindfulness and Mental Health
 - Introduction to Meditation
 - Mindful Eating Practices
 - Present Moment Awareness
- **Resilience Category:**
 - Building Emotional Resilience
 - Bouncing Back from Setbacks
 - Growth Mindset Development
 - Resilience in Adversity

7.2 Self-Help Tools Flow

- **Self-Help Tools** → Tool categories (card grid): Breathing Exercises, Thought Challenging, Mindfulness Meditation, Mood Tracking
- Each tool card shows: Icon and color coding, Title and description, Category badge, Duration estimate, Difficulty level, Sub-tools available, Start button
- Tool usage tracking: Frequency of use, Favorite tools, Effectiveness ratings

Breathing Exercises Tool

- Click "Breathing Exercises" → Interactive Tool
- **Exercise selection:**
 - 4-7-8 Breathing: Inhale 4s, Hold 7s, Exhale 8s

- Box Breathing: Inhale 4s, Hold 4s, Exhale 4s, Pause 4s
- Simple Breathing: Inhale 4s, Exhale 4s
- **Visual guide interface:** Large circular timer display, Current phase indicator (Inhale/Hold/Exhale), Breath count tracker, Total time elapsed, Breathing animation (expanding/contracting circle)
- **Controls:** Play/Pause button, Reset button, Exercise type selector, Sound toggle (breathing audio cues)
- **Session tracking:** Number of cycles completed, Total duration
- **Post-session:** "How do you feel?" rating, Notes field, Share progress, Schedule reminder

Thought Challenging Tool

- Click "Thought Challenging" → Cognitive Exercise
- **Thought Record Interface:**
 - Step 1: Identify the situation (Text input: Describe what happened)
 - Step 2: Identify emotions (Emotion selector multi-select, Intensity slider 0-10)
 - Step 3: Automatic thoughts (What went through your mind?)
 - Step 4: Evidence for the thought (List builder interface)
 - Step 5: Evidence against the thought (List builder interface)
 - Step 6: Alternative perspective (What's a more balanced view?)
 - Step 7: Re-rate emotions (Intensity slider comparison)
- Guided prompts (Context-sensitive questions); Examples for each step; CBT education snippets
- Save and review: Save thought record, View past records, Pattern identification, Progress over time
- Export options: Share with therapist, Print worksheet, Download PDF

Mindfulness Meditation Tool

- Click "Mindfulness Meditation" → Meditation Interface
- **Meditation type selection:**
 - Body Scan (10-30 min)
 - Loving Kindness (10-20 min)
 - Mindful Breathing (5-15 min)
 - Walking Meditation (10-20 min)
- **Meditation player interface:** Audio player controls, Voice selection (if available), Background sound options, Timer display, Progress bar
- **Meditation guidance:** Narrated instructions, Pause points for practice, Gentle return cues, Closing reflection
- **Meditation tracking:** Consecutive days streak, Total minutes meditated, Favorite practices, Progress milestones
- **Post-meditation:** Mindfulness rating, Journal prompt, Insights noted, Schedule next session

Mood Tracking Tool

- Click "Mood Tracking" → Daily Mood Logger
- **Quick mood check-in:** Mood selector (emoji/scale), Energy level slider, Anxiety level slider, Sleep quality rating, Optional notes field
- **Trigger identification:** What influenced your mood? (Positive events, Challenging situations, Physical factors)
- **Pattern analysis over time:** Mood trends graph, Trigger frequency, Best/worst times of day, Day of week patterns, Correlation insights
- **Mood history:** Calendar view with color coding, Weekly/monthly summaries, Detailed entry view
- Export data (CSV/PDF)
- **Insights generation:** AI-powered pattern detection (via Google AI Studio), Suggestions for improvement, Resource recommendations, When to seek help indicators

7.3 Find Help Flow

- **Find Help** → Professional directory interface
- Three main tabs: **Find Professionals** (default), **Crisis Resources**, **Support Organizations**
- Search and filter system

Find Professionals Tab

- **Search interface:**
 - Location input (City, State, Zip; Use current location GPS)
 - Distance radius selector
 - Professional type filter: Psychiatrists, Psychologists, Licensed Therapists, Mental Health Counselors, Clinical Social Workers
 - Specialization filter (multi-select): Anxiety Disorders, Depression, Trauma/PTSD, Addiction, Eating Disorders, Relationship Issues, Grief/Loss, ADHD, Teen/Adolescent, Family Therapy
 - Insurance provider filter (Major providers list, Medicaid/Medicare, Self-Pay, Sliding Scale)
 - Additional filters: Accepting new patients, Telehealth available, Gender preference, Languages spoken, Evening/weekend availability
- **Search results:** Provider cards (list view)
 - Sort options: Distance (nearest first), Rating (highest first), Availability (accepting first), Insurance match
 - Results count and pagination

Provider Card Details

- Each **Provider Card** Displays:
 - **Provider header:** Name and credentials, Professional type, Profile photo (if available), Accepting new patients badge
 - **Practice information:** Practice name, Full address, Distance from search location, Phone number (click to call), Website link
 - **Specializations** (tags); **Insurance accepted** (collapsible list)

- **Rating and reviews:** Star rating (out of 5), Number of reviews, Link to full reviews
- **Availability features:** Telehealth available badge, Office visits badge, Languages spoken
- **Actions:** View Full Profile button, Contact button (opens modal), Save to Favorites (heart icon), Share option

Provider Profile Expanded View

- Click "View Full Profile" → **Detailed Provider Page**
- **Professional details:** Full biography, Education and training, Years in practice, Licenses and certifications, Professional memberships, Treatment approaches, Services offered (Individual therapy, Group therapy, Family/couples therapy, Medication management, Psychological testing)
- **Practice details:** Office hours, Session length and fees, Insurance details, Payment options, Cancellation policy, Telehealth setup requirements
- **Location and accessibility:** Embedded map, Parking information, Public transit options, Accessibility features
- **Patient reviews:** Overall rating breakdown, Review highlights, Recent reviews (anonymized), Sort/filter reviews, Write a Review (for patients)
- **Contact options:** Request appointment form, Message provider, Call directly, Email inquiry

Crisis Resources Tab

- **Immediate help banner:** Large, prominent emergency contacts
- **Crisis hotline cards** (always accessible):
 - National Suicide Prevention Lifeline: Phone 988, Description (24/7 free confidential support), Website link, Languages available, Call Now button
 - Crisis Text Line: Text HOME to 741741, Description (Free 24/7 crisis support), Website link, Start Texting link
 - SAMHSA National Helpline: Phone 1-800-662-4357, Treatment referral service, Available 24/7
 - National Domestic Violence Hotline: Phone 1-800-799-7233, Support for domestic violence, TTY option available
- **Specialized crisis resources:** Trevor Project (LGBTQ+ youth), Veterans Crisis Line, Disaster Distress Helpline, Substance Abuse Helpline, International resources (Crisis lines by country)
- **Safety planning resources:** Creating a safety plan guide, Downloadable safety plan template, Emergency contact card, Coping strategies list

Important Disclaimers - Crisis Support Integration

- Always Accessible: Sidebar link, footer link, dedicated page
- Prominent: Red/orange color scheme for visibility
- Clear Contact Info: Phone numbers, text lines, websites
- No Barriers: No login required for crisis resources

Features & Functionality

1. Authentication & User Management

- Supabase Auth integration for secure login/signup
- Profile management (Settings page)
- Session persistence across devices

2. Assessments

- Interactive question flows with progress tracking
- Results visualization and personalized insights (powered by AI Models via Google AI Studio)
- History and retake functionality
- Integration with journal for reflection

3. Journaling

- Rich text editor with prompts
- Entry organization (tags, search, calendar)
- Auto-save and export features
- Sentiment analysis integration (future, via AI)

4. Learning Modules

- **Content Types:**
 - Reading Materials: Articles, guides
 - Videos: Instructional content (future)
 - Interactive Exercises: Practice activities
 - Quizzes: Knowledge verification
 - Worksheets: Downloadable PDFs
- **Module Structure:**
 - Sequential lessons/sections
 - Mixed content types (text, video, interactive)
 - Progress tracking
 - Knowledge checks/quizzes
 - Completion certificates
 - Bookmark/resume capability

5. Community Features

- Discussion forums with threading and moderation
- Real-time updates via Supabase Realtime
- AI bias detection in posts (Google AI Studio)
- **Support Groups:**
 - Category-based groups
 - Join/leave functionality
 - Group discussions
 - Scheduled events
 - Member directory

6. Resource Management

- **Educational Content:**
 - Articles: Mental health topics
 - Guides: Step-by-step instructions
 - Videos: Educational content (future)
 - Infographics: Visual information
- **Professional Directory:**
 - Search: Location-based, specialty, insurance
 - Profiles: Provider information
 - Ratings: Community reviews
 - Contact: Direct communication

7. Analytics & Insights

- **Data Visualization:**
 - Line Charts: Trends over time
 - Bar Charts: Comparative data
 - Calendar Heatmaps: Activity patterns
 - Progress Bars: Goal completion
 - Word Clouds: Journal themes (future)
- AI-powered insights from assessments, journals, and mood tracking (via Google AI Studio and Supabase pgvector for RAG)

State Management

Authentication Context

```
// composables/useAuth.js
export const useAuth = () => {
```

```

const user = ref(null);
const session = ref(null);

const signUp = async (email, password) => {
  // Supabase auth logic
};

const signIn = async (email, password) => {
  // Supabase auth logic
};

const signOut = async () => {
  // Supabase auth logic
};

const loading = ref(false);

return {
  user,
  session,
  signUp,
  signIn,
  signOut,
  loading
};
};

```

Data Fetching & Caching

- **TanStack Query (Vue Query):** For API data management
- **Query Keys Structure:**

```

// Example queries
['journalEntries', { userId }],
['assessment', { assessmentId }],
['modules', { status: 'active' }],
['communityPosts', { page: 1, filter: 'recent' }]

```

- **Features:**
 - Caching: Automatic data caching
 - Refetching: Smart background updates
 - Optimistic Updates: Immediate UI feedback
 - Error Handling: Centralized error management

- Loading States: Global loading indicators

Navigation Structure

Authenticated Navigation

- **Sidebar** (Fixed Left, 256px wide):
 - Logo
 - Dashboard
 - Assessments
 - Journal
 - Insights
 - Modules
 - Community
 - Resources
 - Educational Materials (submenu)
 - Self-Help Tools (submenu)
 - Find Help (submenu)
 - Settings
- **Bottom Section:** User profile card, Crisis resources link, Sign out

Public Navigation

- **Navbar** (Fixed Top):
 - Logo (links to /)
 - Features dropdown
 - About
 - Resources
 - Auth buttons: Sign In, Get Started

Performance Optimizations

Code Splitting

- Route-based lazy loading
- Component-level code splitting
- Dynamic imports for heavy features

Asset Optimization

- Image lazy loading
- SVG icons (inline for critical)
- Font subsetting
- CSS purging (custom SCSS)

Data Fetching

- Vue Query caching
- Prefetching on hover
- Background revalidation
- Optimistic updates

Accessibility

- Semantic HTML
- ARIA labels
- Keyboard navigation
- Focus management
- Screen reader support

Future Enhancements

Technical Debt Items

- Comprehensive unit testing
- E2E testing with Playwright
- Performance monitoring (Web Vitals)
- Error tracking (Sentry integration)
- Analytics implementation
- A/B testing framework
- Documentation generation

Success Metrics

User Engagement

- Daily/Monthly Active Users (DAU/MAU)
- Session duration
- Feature adoption rates

- Retention rate (7-day, 30-day)
- Completion rates (assessments, modules)

Technical Metrics

- Page load time: $\leq 2s$
- Time to Interactive: $\leq 3s$
- Error rates: $\leq 0.1\%$
- API response time: $\leq 200ms$
- Crash-free sessions: $\geq 99.9\%$

Conclusion

Mindfluence provides a comprehensive, user-friendly platform for mental health self-awareness and management. The frontend architecture prioritizes:

- **User Experience:** Intuitive navigation, clear information hierarchy
- **Accessibility:** Inclusive design for all users
- **Privacy:** Secure, privacy-first approach
- **Evidence-Based:** Clinical foundations for all content
- **Safety:** Prominent crisis resources and appropriate disclaimers
- **Engagement:** Interactive tools and community support
- **Growth:** Structured learning paths and progress tracking
- **Scalability:** Modern tech stack for future expansion

The platform serves as a valuable tool for individuals seeking to understand themselves better, manage mental health challenges, and develop healthier thought patterns—while always emphasizing the importance of professional help when needed.
